WEEKLY MORBIDITY REPORT
EXPLANATORY COMMENT

This report presents each week the annual admission rates per 1000 average strength for certain communicable diseases, venereal diseases, and all causes combined (diseases, injuries and poisonings). Source material is the weekly communicable disease reports submitted to BuMed by all shore stations within the continental limits of the United States.

Admission rates are calculated on an annual basis to facilitate comparison with corresponding annual, quarterly or monthly figures. Such annual rates of admission indicate the number of admissions per 1000 average strength which would occur over a year's time if the current week's experience continued for a year. They are obtained as follows:

$$\frac{\text{Number of Admissions During the Week} \times 52}{\text{Average Strength for the Week}} \times 1000$$

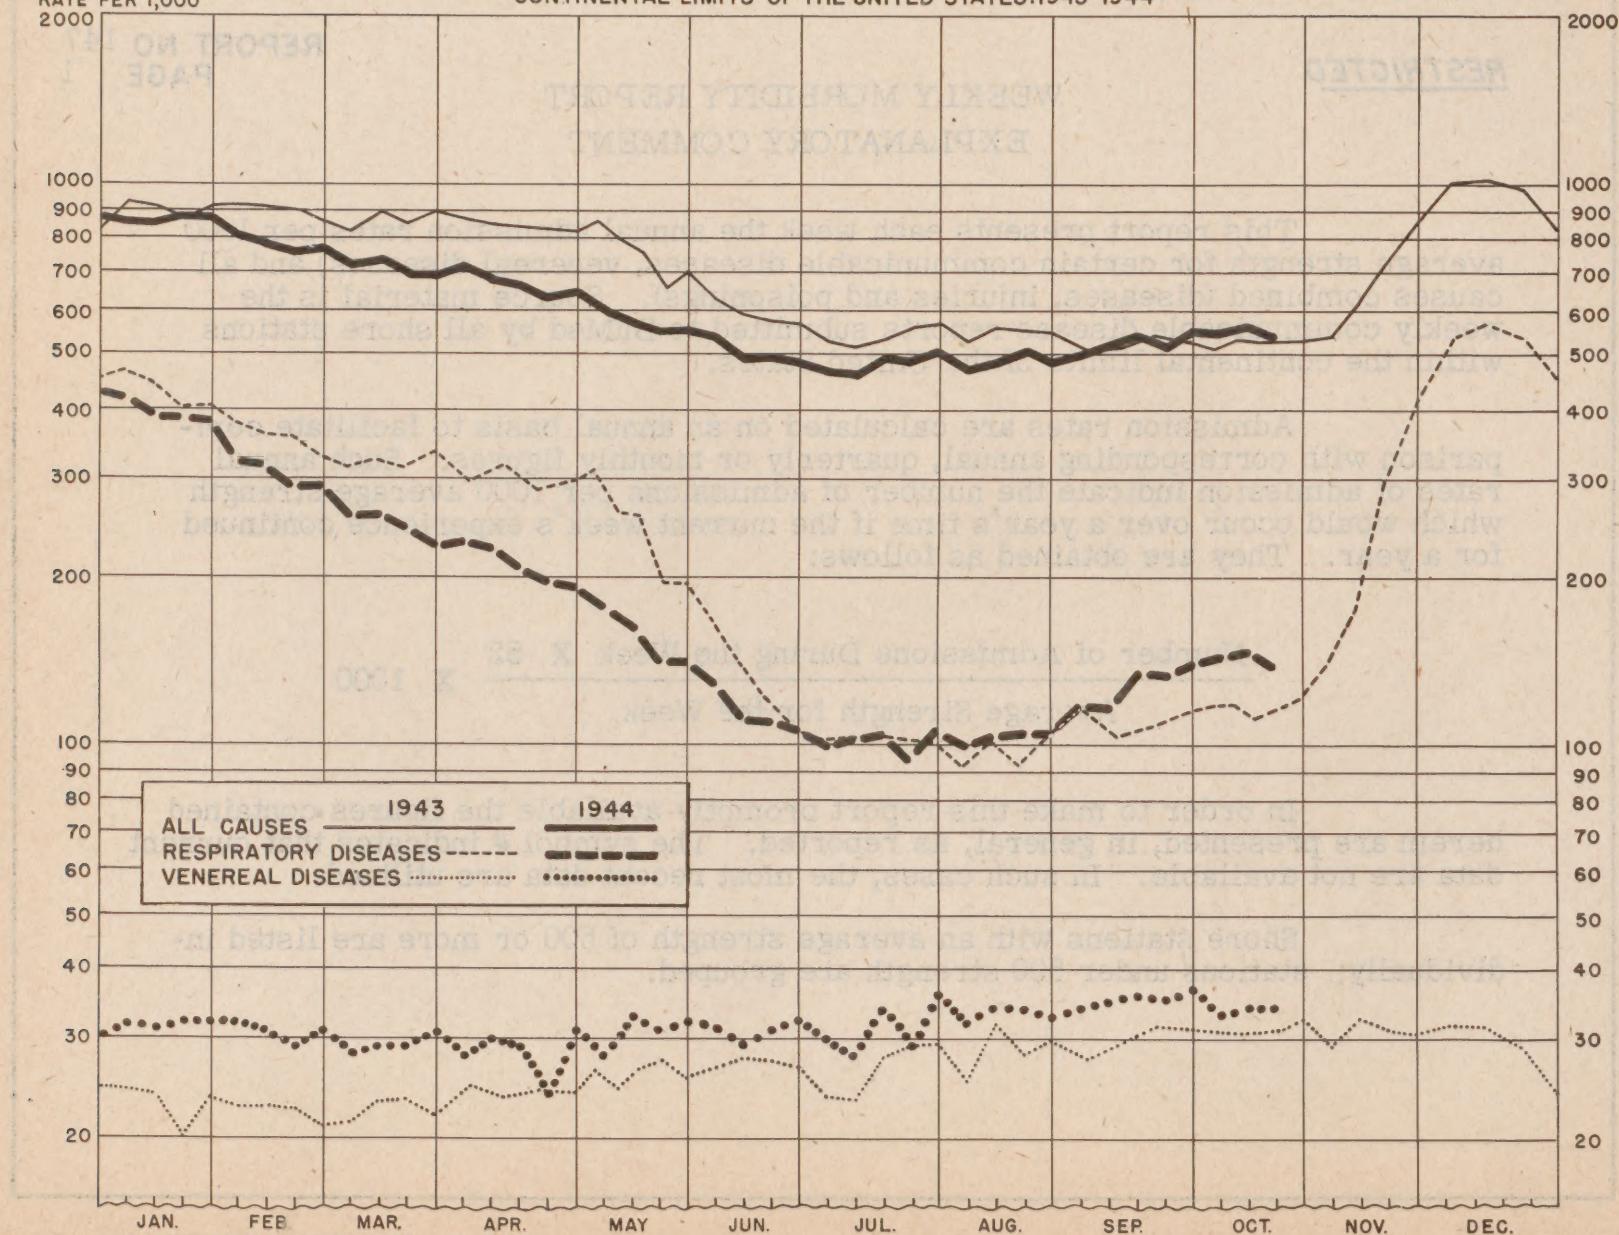

In order to make this report promptly available the figures contained herein are presented, in general, as reported. The symbol # indicates that current data are not available. In such cases, the most recent data are utilized.

Shore stations with an average strength of 500 or more are listed individually; stations under 500 strength are grouped.

RESTRICTED

CURRENT TRENDS

Week Ending 21 Oct 1944

The admission rate for All Causes fell this week, and the curve for 1944 now stands only slightly above the curve for 1943. The highest rate (945) was reported for the Potomac and Severn River Commands, the lowest (376) for the 7th District.

The respiratory disease curve declined this week, but continues to stand above the 1943 curve for the corresponding period. The highest rate (264) was reported for the 13th District, the lowest (83) for the 1st District.

The venereal disease curve remained at the same level this week, continuing to stand above the curve for 1943. The highest rate (47) was reported for the 8th District, the lowest rate (24) for the 6th District.

Influenza and Catarrhal Fever. The rate for these infections showed no change this week. The curve for 1944 stands well below the 1942 and 1943 curves for the corresponding period. The 9th District reported the highest rate (143), the 1st District the lowest (64).

Pneumonia--Broncho and Lobar. The rate for these diseases still stands at 2. The curve for 1944 continues below the 1942 and 1943 curves for the corresponding period. The 4th District reported the highest rate (4), and no cases were reported for the 6th and 7th Districts.

Pneumonia, Atypical. The atypical pneumonia rate stands at 4 again this week. The curve for 1944 remains above the curve for 1943 for the corresponding period. The 11th District reported the highest rate (8). The Potomac and Severn River Commands reported no cases.

Tonsillitis and Pharyngitis, Acute. The rate for these infections dropped slightly this week. The 13th District reported the highest rate (166), the 1st District the lowest (13).

CURRENT TRENDS --CONTD.

Rheumatic Fever, Acute. After standing at 1 for 5 weeks, the rate rose to 2 this week. The curve for 1944 now stands above the curve for 1943 for the corresponding period. The 13th District reported the highest rate (17). No other District reported a rate above 2.

Scarlet Fever. The scarlet fever rate fell slightly this week. The 1944 curve remains above the curve for 1942 and 1943 for the corresponding period. The highest rate (59) was reported for the 13th District. Five Districts reported no cases.

Cerebrospinal Fever, Meningococcic. The rate for this infection fell slightly. The curve for 1944 stands below the 1943 curve for the corresponding period. Cases were reported only from the 3rd and 5th Districts.

Malaria. The rate of 3 remained unchanged for the 5th consecutive week, and the 1944 curve continues below the 1943 curve for the corresponding period. The highest rate (10) was reported for the 1st District, the lowest rate (0.7) for the 7th District.

Measles. The measles curve rose slightly this week and stands above the 1943 curve for the corresponding period. The 13th District reported the highest rate (4). Four Districts and the Potomac and Severn River Commands reported no cases.

Poliomyelitis, Anterior, Acute. Two new cases of poliomyelitis were reported for the week among Naval personnel in Continental Shore Stations; one case for the 5th District and one case for the 9th District. The cumulative total of poliomyelitis cases reported for all Continental Stations, Jan 1, 1944 through Oct 21, is 65* cases.

The U. S. Public Health Service reports for this week show the civilian cases in the six States with the highest incidence distributed as follows:
